Ong Cheng Yang

Senior full-stack engineer, backend-focused · Team lead

Kuala Lumpur, Malaysia | chengyang9966@gmail.com
chengyangong.com | linkedin.com/in/chengyangong | github.com/chengyang9966

Summary

Engineer with six years of shipping production software, most of it on the backend: Node.js services, REST and GraphQL APIs, event-driven workflows on queues and webhooks, PostgreSQL and AWS. Team lead at Giv AI Labs, and founder of TechDevX, where I built an OpenID Connect identity provider and a multi-tenant CRM with a WhatsApp AI agent.

Skills

Backend	Node.js, TypeScript, Express, Fastify, Hono, REST, GraphQL, .NET Core
Event-driven	Redis + BullMQ job queues, webhooks (Stripe, WhatsApp Cloud API), AWS Lambda, scheduled workers
Data	PostgreSQL, Prisma, multi-tenant data scoping, Redis
Cloud & DevOps	AWS (ECS, Lambda, Cognito, EC2, S3, RDS, CloudFront, CloudWatch), Docker, GitHub Actions CI/CD
Auth & security	OpenID Connect, OAuth (Google, GitHub, Apple), PKCE, JWT/JWKS, audit logging
Frontend & mobile	React, Next.js, React Native, Redux Toolkit, Angular
AI	Claude and OpenAI APIs, structured outputs, AI agents with guardrails

Experience

Team Lead, Giv AI Labs Sdn Bhd — Aug 2025 – Present

- Lead the engineering team building Mantiq Launch, an AI platform whose 21 tools take founders from an idea to a launched business, and AI tools for teachers.
- Build product features and the services behind them in Next.js, TypeScript and Node.js.
- Migrated authentication to AWS Cognito and moved services onto AWS ECS.
- Run planning and code review, and work with the business on what to build next.

Founder, TechDevX — 2024 – Present

- LeadFlow (own product): multi-tenant CRM. Fastify API and Next.js apps on PostgreSQL, with every query scoped to its business; Redis/BullMQ workers for background jobs; WhatsApp Cloud API webhooks turn messages into leads.
- Built LeadFlow's WhatsApp AI agent (Claude, OpenAI switchable): replies follow business playbooks, within a daily cost cap, and any reply that fails validation is dropped instead of sent.
- TechDevX Identity: OpenID Connect provider (authorization code + PKCE, RS256 tokens, JWKS) on Hono, Better Auth and PostgreSQL, serving multiple organisations; Stripe plans become token entitlements and signed webhooks to client apps.
- Security and quality: append-only audit log, rate limiting, hardened read-only containers, secret scanning; about 400 automated tests including Playwright end-to-end OIDC flows.
- Client work: an agent commission and settlement portal for 300+ agents that cut reconciliation time by 85% (Next.js, PostgreSQL, Stripe); a headless marketing site with lead routing that grew inbound leads 3.2×.

Freelance Full-stack Developer, Arkmind — Oct 2024 – Jul 2025

- Full-stack development on Arkmind's web systems, across front end and Node.js services.

Senior Full-stack Developer, Vitalz Sdn Bhd — Jan 2024 – Oct 2024

- Built the Signsbeat web and mobile apps from scratch, an AI wellness companion released on the App Store.
- Connected wearable devices over Bluetooth and synced their readings into a longevity index and recovery trends.
- Shipped the AI health assistant and lifestyle insights on top of the synced data.

Node.js Developer, CelcomDigi Berhad — Jan 2022 – Dec 2023

- Debugged and fixed production issues in backend services.
- Introduced AWS Lambda to the backend.
- Built reusable components and improved the user experience of internal products.

Software Engineer, Syntrino Solutions — May 2021 – Dec 2021

- Worked on PeopleX, an HR platform for leave, claims, payslips and attendance: built its virtual business card, the Thrive web app redesign and new system email templates (React, Next.js, .NET Core).

Software Engineer, IFCA Sdn Bhd — Sep 2020 – May 2021

- Built features for HotelX, a cloud hotel management system used by 1,000+ properties, in React, TypeScript, Node.js and GraphQL.
- Integrated Revenue Monster payments, WhatsApp and Telegram messaging, and NodeMailer email.

Selected freelance projects

Loan application system, Arkmind — 2022 – 2023

Built and maintained the system a finance company uses to take in and process loan applications (React, Redux Toolkit, Node.js, Express, Prisma).

Cashier admin system, FirebiredIt — 2022 – 2023

Built a new cashier and back-office admin system from the ground up (React, Redux Toolkit, Node.js, Express, Prisma).

Education

Higher Diploma in Financial Technology, Letterkenny Institute of Technology, Ireland — 2019

BA (Hons) Business Management, Enterprise Development Award, Letterkenny Institute of Technology, Ireland — 2018

European Business and Economics Programme, Berlin School of Economics and Law, Germany — 2017

Diploma in Business Management, University of Malaya, Malaysia — 2016
